DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 29-37 are rejected under 35 U.S.C. 102(e) as being anticipated by Smith et al. '827.

The patent to Smith et al. discloses a Navigational system that uses vehicles with GPS devices as probe vehicles to find current traffic conditions and congestion to provide other users with data to map route segments that are speed sensitive from one location to another, as disclosed in column 3.
